1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Symetra National Life Insurance Company (The Company) have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Division, Department of Commerce, of the State of Iowa (the Department).

Companies domiciled in the state of Iowa prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual (NAIC SAP)*, subject to any deviations prescribed or permitted by the Department. A reconciliation of the Company's net income and surplus between NAIC SAP and practices prescribed and permitted by the state of Iowa is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes available, which could impact the amounts reported and disclosed herein.

C. Accounting Policy

Premiums are recognized annually on the policy anniversary for individual traditional life policies, consistent with the statutory reserving process. Premiums for universal life policies are recognized when received.

In addition, the following provides a summary of the Company's key accounting policies:

2)

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds, excluding loan-backed and structured securities are stated at amortized cost using the scientific method, except for those with an NAIC designation of 6, which are reported at lower of amortized cost or fair value.
- (3) The Company does not currently invest in common stocks.
- (4) The Company does not currently invest in preferred stocks.
- (5) The Company does not currently invest in mortgage loans.
- (6) Loan-backed bonds and structured securities, for which the collection of all contractual cash flows is probable, are reported at amortized cost using the retrospective methodology consistently applied by type of security, except for those in or near default, which are reported at the lower of amortized cost or fair value. The retrospective methodology changes both the yield and the asset balance so that the expected future cash flows produce a return on the investment equal to the return now expected over the life of the investment as measured from the date of acquisition.

- (7) The Company has no investments in subsidiaries, controlled or affiliated companies.
- (8) The Company has no ownership interests in joint ventures, partnerships or limited liability companies.
- (9) The Company does not currently invest in derivatives.
- (10) The Company does not use anticipated investment income as a factor in the premium deficiency calculation.
- (11) The Company has no accident or health contracts.
- (12) The Company has not made material modifications to its capitalization policy from the prior year.
- (13) The Company has no pharmaceutical rebate receivables.

B. Debt Restructuring

C. Reverse Mortgages

The Company has no investments in reverse mortgages.

D. Loan-Backed Securities

- (1) Prepayment assumptions for single and multi-class mortgage-backed securities are obtained primarily from broker dealer survey values or internal estimates when survey values are not available.
- (2) The Company did not recognize other-than-temporary impairments (OTTI) for loan backed and structured securities due to the intent to sell or inability to hold for the year ended December 31, 2017.

- (3) As of December 31, 2017 the Company did not hold any investments in loan-backed and structured securities for which OTTI has been recognized where the present value of cash flows expected to be collected is less than the amortized cost of the security.
- (4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):
 - a. The aggregate related amount of unrealized losses:

1. Less than 12 months	\$ _
2. 12 months or longer	40,473

- b. The aggregate related fair value of securities with unrealized losses:
 - 1. Less than 12 months \$ —
 2. 12 months or longer 1,814,404
- (5) The Company's review of available-for-sale securities for OTTI includes both quantitative and qualitative criteria. Quantitative criteria include the length of time and amount that each security is in an unrealized loss position (i.e., is underwater) and, for bonds, whether expected future cash flows indicate a credit loss exists.

While all securities are monitored for impairment, the Company's experience indicates that under normal market conditions, securities for which the cost or amortized cost exceeds fair value by less than 20% do not typically represent a significant risk of impairment and, often, fair values recover over time as the factors that caused the declines improve. If the estimated fair value has declined and remained below cost or amortized cost by 20% or more for at least six months, the Company further analyzes the decrease in fair value to determine whether it is an other-than-temporary decline. To make this determination for each security, the Company considers, among other factors:

- Extent and duration of the decline in fair value below cost or amortized cost;
- Financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations, earnings potential or compliance with terms and covenants of the security;
- Changes in the financial condition of the security's underlying collateral;
- Any downgrades of the security by a rating agency;
- · Nonpayment of scheduled interest;
- Other indications that a credit loss has occurred; and
- For bonds, the Company's intent to sell or whether it is more likely than not the Company will be required to sell the bond prior to recovery of its amortized cost, considering any regulatory developments, prepayments or call modifications and the Company's liquidity needs.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions
- F. I. Repurchase Agreements and/or Securities Lending Transactions

The Company has no investments in repurchase agreements or securities lending transactions.

J. Real Estate

On December 22, 2017, Public Law No. 115-97 (2017 Tax Act) was signed into law, reducing the corporate tax rate from 35% to 21%, effective January 1, 2018. The effects of the 2017 Tax Act have been reasonably estimated, and the following amounts were recorded in the Summary of Operations for the year ending December 31, 2017.

Line 40: Change in net deferred income tax	\$ (292,303)
Line 41: Change in nonadmitted assets	 233,993
Total impact to surplus	\$ (58,310)

These amounts are included in the above table as part of the Net change in DTA/(DTL) and line 2.c. Nonadmitted Ordinary DTAs.

This impact is due to the re-measurement of deferred tax assets and liabilities to reflect changes in enacted tax rates and tax reserve computations under the 2017 Tax Act. As analysis of the 2017 Tax Act is completed and any additional guidance issued by the U.S. Treasury Department, the IRS, and other standard-setting bodies is interpreted, there may be adjustments to the provisional amounts used to calculate the net admitted DTA. Those adjustments may materially impact the provision for income taxes in the period in which the adjustments are made.

D. Reconciliation of Federal Income Tax Rate to Actual Effective Rate

20. Fair Value Measurements

A. Assets Measured at Fair Value

The Company had no financial assets or financial liabilities recorded at fair value as of December 31, 2017, or 2016.

The Company determines the fair value of its financial instruments based on the fair value hierarchy, which favors the use of observable inputs over the use of unobservable inputs when measuring fair value.

The Company has categorized its financial instruments into the three-level hierarchy, which gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The level assigned to a fair value measurement is based on the lowest-level input that is significant to the measurement. The fair value measurements for the Company's financial instruments not carried at fair value, but disclosed at fair value are categorized as follows:

- Level 1 Unadjusted quoted prices in active markets for identical instruments.
- Level 2 Quoted prices for similar instruments in active markets and model-derived valuations whose inputs are
 observable. This category includes those financial instruments that are valued using industry-standard pricing
 methodologies or models. All significant inputs are observable or derived from observable information in the
 marketplace.
- Level 3 Fair value estimates whose significant inputs are unobservable. This includes financial instruments for which fair value is estimated based on industry-standard pricing methodologies and internally developed models utilizing significant inputs not based on or corroborated by readily available market information. In limited circumstances, this may also utilize estimates based on non-binding broker quotes.

C. Fair Values for all Financial Instruments by Levels 1, 2 and 3:
