1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of First Symetra National Life Insurance Company of New York (the Company) have been prepared in conformity with the National Association of Insurance Commissioners (NAIC) *Accounting Practices* and *Procedures Manual* and *Annual Statement Instructions*, except to the extent that practices prescribed or permitted by the state of New York Insurance Department differ. No differences exist in prescribed practices that result in a material effect on surplus as of December 31, 2012 or 2011.

The Company has received written approval from the Department to borrow funds from Symetra Life Insurance Company (the Parent).

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting principles (SAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes available, which could impact the amounts reported and disclosed herein.

C. Accounting Policy

Premiums are recognized annually on the policy anniversary for individual traditional life policies, consistent with the statutory reserving process. Premiums for universal life policies and annuity considerations with mortality and morbidity risk are recognized when received. Amounts received under deposit-type contracts with no life contingencies are recorded as liabilities when received. Group health premiums are recognized when due. The costs of acquiring and renewing business and sales inducements are expensed when incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds, excluding loan-backed and structured securities are stated at amortized cost using the scientific method, except for those with an NAIC designation of 6, which are reported at lower of amortized cost or fair value.
- (3) The Company does not currently invest in common stocks.
- (4) The Company does not currently invest in preferred stocks.
- (5) Mortgage loans on real estate are carried at the outstanding principle balances less any impairments.
- (6) Loan-backed bonds and structured securities are valued and reported in accordance with the *Purposes and Procedures Manual of the NAIC Securities Valuation Office* (SVO) and Statement of Statutory Accounting Principles (SSAP) No. 43-Revised, *Loan-backed and Structured Securities*. Loan-backed and structured securities subject to a single NAIC designation and for which the collection of all contractual cash flows is probable, are reported at amortized cost using the retrospective methodology consistently applied by type of security, except for those with an NAIC designation of 6, which are reported at the lower of amortized cost or fair value. The retrospective methodology changes both the yield and the asset balance so that the expected future cash flows produce a return on the investment equal to the return now expected over the life of the investment as measured from the date of acquisition. NAIC designations for non-agency residential mortgage-backed and commercial mortgage-backed securities are based on security level expected losses as modeled by independent third parties engaged by the NAIC and the Company's statutory carrying value of the security rather than being based on the rating of a third party rating agency.
- (7) The Company has no investments in subsidiaries, controlled or affiliated companies.
- (8) Investments in limited partnerships consist of state tax credit investments. These are initially recorded at cost and subsequently carried at amortized cost. As of December 31, 2012, the Company was invested in one state tax credit investment. Annual amortization is based on the proportion of tax benefits received in the current year to total estimated tax benefits to be allocated to the Company and is recorded in net investment income. A liability is also recorded for future equity contributions at the present value of future contributions, which are considered unconditional and legally binding.
- (9) The Company does not currently invest in derivatives.
- (10) The Company does not use anticipated investment income as a factor in the premium deficiency calculation.
- (11) For medical specific stop-loss policies, the liabilities are calculated using a gross premium valuation method, with assumptions and adequacy reviewed on a quarterly basis. For medical aggregate stop-loss policies, the liabilities are calculated using the gross premium valuation method (similar to the medical specific stop-loss policies) with the assumptions to be reviewed annually.
- (12) The Company has not materially modified its capitalization policy from prior year.
- (13) The Company has no pharmaceutical rebate receivables.

2. Accounting Changes and Correction of Errors

The Company adopted SSAP No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10* as of January 1, 2012. This SSAP establishes statutory accounting principles for current and deferred federal and foreign income taxes and current state income taxes. Additionally, the eligibility test under SSAP No. 10R, *Income Taxes-A Temporary Replacement of SSAP No 10* is eliminated and the admissibility limitation is altered. Upon adoption the Company recorded an adjustment to reclassify \$831,780 of additional deferred tax assets from special surplus funds to unassigned funds. There was no cumulative effect adjustment as a result of adopting SSAP No. 101 or material impact on the Company's assets, liabilities or income.

The Company adopted SSAP No. 35R, *Guaranty Funds and Other Assessments* as of January 1, 2011. This SSAP expands guidance on recognition of assets from premium tax offsets to match recognition guidance of related accrued liabilities for assessments. Additionally, estimated premium tax recoverable assets are limited to in-force policies and do not include expected renewals on short-term contracts. The adoption did not have a material impact on the Company's assets, liabilities, income or surplus.

Correction of Errors

There were no errors discovered during the year ended December 31, 2012.

During 2011, the Company discovered an error relating to accrued commissions on two of the Company's deferred annuity products. The Company has agreements with certain distributors to pay a commission if customers transfer their contract to a similar deferred annuity product any time after the surrender charge period. The Company was estimating and accruing commission expense related to these contracts during the initial policy contract period. The Company now records this commission expense as incurred. The Company made a correction to decrease the liability accrued for these commissions to \$0 and recorded an increase in surplus of \$1,127,538, net of tax.

- (4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):
 - a. The aggregate related amount of unrealized losses

1. Less than 12 months \$ - 2. 12 months or longer (78,430)

 The aggregate related fair value of securities with unrealized losses

 1. Less than 12 months
 \$

 2. 12 months or longer
 2,073,236

(5) The Company's review of loan-backed securities for OTTI includes both quantitative and qualitative criteria. Quantitative criteria include the length of time and amount that each security is in an unrealized loss position (i.e., is underwater) and whether expected future cash flows indicate a credit loss exists.

While all securities are monitored for impairment, the Company's experience indicates that securities for which the cost or amortized cost exceeds fair value by less than 20% do not represent a significant risk of impairment and, often, fair values recover over time as the factors that caused the declines improve. If the estimated fair value has declined and remained below cost or amortized cost by 20% or more for at least six months, the Company further analyzes the decrease in fair value to determine whether it is an other-than-temporary decline. To make this determination for each security, the Company considers, among other factors:

- Extent and duration of the decline in fair value below cost or amortized cost;
- The financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations, earnings potential or compliance with terms and covenants of the security;
- Changes in the financial condition of the security's underlying collateral;
- Any downgrades of the security by a rating agency;
- Any reduction or eliminations of dividends or nonpayment of scheduled interest payments;
- Other indications that a credit loss has occurred; and
- The Company's intent to sell or whether the Company has the intent and ability to retain the investment for a period of time sufficient to recover the amortized cost basis.

The Company has no investments in repurchase agreements or securities lending transactions.

20. Fair Value Measurements

(A) Assets Measured at Fair Value

Included in various investment-related line items in the financial statements are certain financial instruments that are measured and reported at fair value.

The fair value measurement reflects the price at which the security would sell in an arms-length transaction between a willing buyer and seller in possession of the same information. The Company determines the fair value of its financial instruments based on the fair value hierarchy, which requires an entity to maximize its use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into the three-level hierarchy, which gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The level within which the fair value measurement falls is determined based on the lowest-level input that is significant to the fair value measurement. The Company's financial assets recorded at fair value on the balance sheet and financial instruments not carried at fair value, but disclosed at fair value are categorized as follows:

- Level 1 Unadjusted quoted prices in active markets for identical instruments. This level consists of actively traded mutual fund investments.
- Level 2 Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

This level includes those financial instruments that are valued using industry-standard pricing methodologies or models. All significant inputs are observable or derived from observable information in the marketplace. Financial instruments in this category primarily include bonds.

- Level 3 Instruments whose significant value drivers are unobservable. This comprises financial instruments for which fair value is estimated based on industry-standard pricing methodologies and internally developed models utilizing significant inputs not based on or corroborated by readily available market information. In limited circumstances, this category may also utilize non-binding broker quotes. This category primarily consists of annuity and deposit contracts and mortgage loans.
 - (1) Fair value assets measured and reported as of December 31, 2012:

Assets at fair value	Level 1		Level 2		L	evel 3	Total
