No differences exist in the prescribed or permitted practices that result in a material effect on surplus as of March 31, 2025 or December 31, 2024.

Under Iowa State Insurance Code Section 508A.1(3) and 508A.1(4) and per Iowa Bulletin 07-06, the Department allows insurance companies with approval from the commissioner to use other than market value for assets held in a separate account where general account guarantees are present. The Company, with explicit permission from the Department, is permitted to record the separate account assets related to its bank owned life insurance (BOLI) and registered index-linked annuities (RILA) business at other than market value. The assets of the BOLI and RILA separate accounts primarily include bonds and mortgage loans that are recorded in accordance with the guidance otherwise applicable to these assets (see Annual Statement Note 1.C). Therefore, there is no impact to net income or surplus.

Under Iowa Bulletin 06-01, the Department allows insurance companies to record the change in the fair value of derivative instruments purchased to hedge indexed products in the Summary of Operations to be consistent with how the change in indexed product reserves are recorded. The Company uses this election for its indexed- universal life (IUL) and RILA product. There is no impact to surplus.

Under Iowa Administrative Code (IAC) 191-97, the Department allows companies to account for eligible derivative assets using the amortized cost method if the company can demonstrate they meet the criteria for an economic hedge. The corresponding amortization for eligible derivative assets are recorded as a decrease to net investment income. Furthermore, when eligible derivative assets mature, any value received by the Company is reflected as investment income. IAC 191-97 also prescribes the use of a reserve calculation methodology for indexed annuity products that only reflects credited interest on reserves at the conclusion of the index term based on actual index performance. The Company uses this election to adopt IAC 191-97 effective January 1, 2020 for its fixed indexed annuity (FIA) product.

As of March 31, 2025, the market value of eligible derivative assets was \$334,788,752 and the Actuarial Guideline XXXV reserves would have been \$12,456,143,634 using the market value of eligible derivative assets.

The state of Iowa has adopted a prescribed accounting practice that differs from that found in the NAIC SAP related to the admission of a variable funding note as capital and surplus. Symetra Reinsurance Corporation, a wholly-owned subsidiary of the Company, is entitled to admit as an asset, the value of a variable funding note in conjunction with a reinsurance agreement with the Company as prescribed by Iowa Administrative Code 191-99.11(3). There was no impact to net income. If the Company had not used this prescribed practice, the result would not have triggered a regulatory event at the Company.

The Company has explicit permission from the Department to record the change in fair value of equity equity-type investments, and certain derivative instruments where hedge accounting is not elected held in a segregated portfolio through the statements of operations instead of surplus. This portfolio includes investments supporting a block of structured settlement annuities that were reinsured to Resolution Re, Ltd (the reinsurer) in 2018. The change in the fair value of these assets is passed to the reinsurer quarterly in accordance with the reinsurance agreement. The Company received explicit permission from the Department to extend the approved permitted accounting practice to a segregated portfolio that includes investments supporting a block of fixed indexed annuities (FIA) and fixed deferred annuities that were reinsured under an affiliated modified coinsurance agreement with Symetra Bermuda Re Ltd ("SBR") effective January 1, 2022.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes available, which could impact the amounts reported and disclosed herein.

C. Accounting Policy

- (1) No change
- (2) Bonds, excluding asset-backed and structured securities, and surplus notes not backed by other loans are stated at amortized cost using the constant yield method, except for those with an NAIC designation of 6, which are reported at lower of amortized cost or fair value.
- (3) – (5) No change
- (6) Asset-backed securities, including mortgage backed securities, are stated at amortized cost, except for those with an NAIC designation of 6, which are reported at lower of amortized cost or fair value. Income is recognized using a constant effective yield based on anticipated prepayments and the estimated economic life of the securities. Prepayment assumptions are based on current interest rates and the economic environment. When actual prepayments differ significantly from anticipated prepayments, the effective yield is recalculated to reflect actual payments to date and estimated future payments. The net investment in the security is adjusted to the amount that would have existed had the new effective yield been applied since the acquisition of the security (i.e. the retrospective method). For commercial mortgage-backed interest-only securities, the effective yield is adjusted prospectively for any changes in estimated cash flows. The Company includes any resulting adjustment in net investment income in the current period.
- (7) – (13) No change

D. Going Concern

After evaluating the entity’s ability to continue as a going concern, management was not aware of any conditions or events which raised substantial doubts concerning the entity’s ability to continue as a going concern as of the date of the filing of this statement.

## NOTES TO FINANCIAL STATEMENTS

### 2. Accounting Changes and Correction of Errors

#### Accounting Changes

In 2025, the Company adopted revisions to NAIC Statement of Statutory Accounting Principles SSAP No. 26, *Bonds*, and SSAP No. 43, *Asset-Backed Securities* in alignment with the new Principles-Based Bond Definition (PBBB). The revisions were effective January 1, 2025.

As a result of the adoption, on January 1, 2025 certain securities were reclassified from Bonds (Schedule D, Part 1) to Stocks – Preferred Stocks (Schedule D, Part 2) and Other Invested Assets (Schedule BA). The total amount reclassified was \$165,885,305 with \$129,881,730 moving to Preferred Stocks and \$36,004,575 to Other Invested Assets. The securities transferred to Preferred Stocks include assets within the Company's Separate Accounts.

The reclassification of securities from Bonds (Schedule D, Part 1) to Stocks – Preferred Stocks (Schedule D, Part 2) resulted in a change in measurement from amortized cost to fair value. After remeasurement and transition, the book adjusted carrying value was \$132,715,600.

One of the securities reclassified from Bonds (Schedule D, Part 1) to Other Invested Assets (Schedule BA) resulted in a change in measurement from amortized cost to lower of cost or market. After remeasurement and transition, the book adjusted carrying value was \$9,525,400.

The aggregate impact from the reclassifications was an increase in invested assets of \$2,359,270 with a corresponding increase to unrealized gains within surplus.

In 2025, the Company adopted revisions to NAIC SSAP No. 21, *Other Admitted Items* (SSAP 21) related to residual tranches. All residuals will be accounted for under SSAP 21 regardless of legal form and captured on Other Invested Assets (Schedule BA) on a prospective basis. Upon adoption, the Company elected to report all residuals at the lower of cost or market under the allowable earned yield method. Certain residual tranches that were accounted for at fair value under previous guidance recognized unrealized positions as realized, with the reported value as of December 31, 2024, become the January 1, 2025 cost basis. The revision were effective January 1, 2025. The revisions resulted in a realized gain of \$564,238 and a corresponding decrease to unrealized gains within surplus, resulting in no net impact to surplus.

#### Correction of errors

There were no corrections of errors for the three months ended March 31, 2025.

In 2024, the Company discovered an error relating to cash value floors used in Individual Life reserves calculation. The Company recorded a correction of error as of December 31, 2024, which resulted in an increase to policy reserves and a decrease to surplus of \$6,063,037, net of current taxes.

In 2024, the Company discovered an error relating to pending Life and Accidental Death and Dismemberment benefits claims. The Company recorded a correction of error as of December 31, 2024, which resulted in an increase in death benefits and a decrease to surplus of \$1,477,813, net of current taxes.

In 2024, the Company discovered an error relating to amortization for cross currency swaps purchased in 2023 at a discount. The Company recorded a correction of error as of December 31, 2024 which resulted in an increase to net investment income and a decrease to surplus of \$2,417,681, net of tax.

D. Asset-Backed Securities

- (1) Prepayment assumptions for single and multi-class mortgage-backed securities are obtained primarily from broker dealer survey values or internal estimates when survey values are not available.
- (2) The Company did not recognize other-than-temporary impairments (OTTI) for asset-backed and structured securities recognized due to the intent to sell or inability to hold the security to recovery for the three months ended March 31, 2025.
- (3) As of March 31, 2025, the Company did not hold any investments in asset-backed and structured securities for which OTTI has been recognized where the present value of cash flows expected to be collected is less than the amortized cost of the security.

NOTES TO FINANCIAL STATEMENTS

- (4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):
- a. The aggregate related amount of unrealized losses:
    - 1. Less than 12 months \$ 7,467,624
    - 2. 12 months or longer 117,441,858
  - b. The aggregate related fair value of securities with unrealized losses:
    - 1. Less than 12 months \$ 1,997,523,946
    - 2. 12 months or longer 1,493,689,928

- (5) The Company reviewed its investments with unrealized losses in accordance with its impairment policy. The Company’s evaluation determined, after the recognition of OTTI, that the remaining declines in fair value were temporary and the Company did not intend to sell these securities at an amount below the carrying value prior to maturity (or recovery). For asset-backed bonds and structured securities, the Company expects to recover the entire amortized cost basis.

The Company uses both quantitative and qualitative criteria to review all securities in its holdings. Based on the Company's experience, investments with amortized cost exceeding estimated fair value by less than 20% do not typically represent a significant risk of impairment under normal market conditions. For those with amortized cost exceeding estimated fair value by over 20% and those that were downgraded by a rating agency, the Company compares the security's implied credit spread to the benchmark spread for bonds with significant credit risk. If the security's spread exceeds the defined tolerance compared to this benchmark, the Company further analyzes the decrease in fair value to determine whether it is an other-than-temporary impaired by considering, among other factors, the following:

- Extent of downgrades of the security by a rating agency;
- Extent and duration of the decline in fair value below cost or amortized cost;
- Financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations, earnings potential, or compliance with terms and covenants of the security;
- Changes in the financial condition of the security's underlying collateral;
- Nonpayment of scheduled interest, or the reduction or elimination of dividends; and
- Other indications that a credit loss has occurred.

For bonds and preferred stocks, the Company concludes an OTTI has occurred if a security is underwater and there is an intent to sell the security, or it is more likely than not that the Company will be required to sell the security prior to recovery of its amortized cost, considering any regulatory developments, prepayment or call notifications, and the Company's liquidity needs.

Asset-backed and structured securities are considered other-than-temporarily impaired when the Company has concluded it does not have the intent and ability to retain the security for sufficient time to recover the amortized cost basis, it intends to sell the security prior to maturity at an amount below the carrying value, or it does not expect to recover the entire amortized cost basis even if it has the intent and ability to hold.

### 20. Fair Value Measurements

#### A. Assets and Liabilities Measured at Fair Value

The Company determines the fair value of its financial instruments based on the fair value hierarchy, which favors the use of observable inputs over the use of unobservable inputs when measuring fair value.

The Company has categorized its financial instruments into the three-level hierarchy, which gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The level assigned to a fair value measurement is based on the lowest-level input that is significant to the measurement. The fair value measurements for the Company's financial instruments are categorized as follows:

NOTES TO FINANCIAL STATEMENTS

- Level 1 – Unadjusted quoted prices in active markets for identical instruments.
- Level 2 – Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, model-derived valuations whose inputs are observable, and market corroborated inputs. This category includes financial instruments that are valued using industry-standard pricing methodologies or models. All significant inputs are observable or derived from observable information in the marketplace.
- Level 3 – Fair value estimates whose significant inputs are unobservable. This category includes financial instruments for which fair value is estimated based on industry-standard pricing methodologies and internally developed models utilizing significant inputs not based on or corroborated by readily available market information. In limited circumstances, this may also utilize estimates based on non-binding broker quotes.

- (3) Transfers into and/or out of Level 1, 2, and 3 are reported at the value as of the beginning of the period in which the transfer occurs.
- (4) For bonds reported and measured at fair value, the Company determines whether the market for a security is active and if significant pricing inputs are observable. The Company predominantly utilizes third party independent pricing services to assist management in determining the fair value of its level 2 bonds. Prices received from the pricing services are not adjusted, and multiple prices for these securities are not obtained. The pricing services provide prices where observable inputs are available.

In situations where the Company is unable to obtain sufficient market-observable information upon which to estimate the fair value of a particular security, fair values are determined using internal pricing models that typically utilize significant, unobservable market inputs or inputs that are difficult to corroborate with observable market data. Such measurements are classified as Level 3 and typically include private placements and other securities that the pricing services are unable to price.

The fair values of preferred stocks are valued by pricing services utilizing evaluated pricing models. These valuations are created based on benchmark curves using industry standard inputs and exchange prices of underlying securities of the same issuer. As these inputs are considered observable, preferred stocks are classified as a Level 2 measurement.

The Company's unaffiliated common stocks primarily include FHLB DM common stock and publicly traded common stocks. The FHLB DM common stock is based on redeemable par value and is classified as a Level 2 measurement. The publicly traded common stocks are based on quoted market prices in active markets for identical assets and are classified as a Level 1 measurement.

Derivatives reported and measured at fair value, which include index options and consist primarily of Standard & Poor's 500 Index® (S&P 500) options. The fair values of most options were determined using option pricing models. Significant inputs include index implied volatilities, index dividend yields, index prices, a risk-free rate, option term, and option strike price. As these inputs are observable, most options are classified as a Level 2 measurement. The fair values of other options are determined using Symetra and counterparty's proprietary pricing models and assumptions, as these inputs are not observable, such options are classified as a Level 3 measurement. Cross currency swaps and forwards are valued using a discounted cash flow model. The significant inputs include the projected cash flows, currency spot rates, swap yield curve, and cross currency basis curve. As these inputs are observable, the cross currency swaps and forwards valuation are classified as a Level 2 measurement.

The Company utilizes the fair value option for these investments, regardless of ownership percentage, to standardize the related accounting and reporting. The investments in hedge funds have varying investment strategies, redemption terms and conditions.
