In the business discussions that follow, results for the third quarter of 2015 are compared with those of the third quarter of 2014, and are pretax, unless otherwise noted.

Benefits Division

- Pretax adjusted operating income was \$25.0 million for the quarter, up from \$20.6 million in the prior period. Growth in the medical stop-loss business drove increases in premium revenues and related benefits and operating expenses. The loss ratio was favorable to the target range, and the ratio of operating expenses to premiums continued to improve.
- **Loss ratio** was 63.7% for the quarter, compared with 62.7% for the prior period. The current target range is 65%–67%. From quarter to quarter, some variability in the loss ratio is expected.
- Sales were \$37.5 million for the quarter, compared with \$34.8 million in the previous period.

Retirement Division: Deferred Annuities

- Pretax adjusted operating income was \$43.1 million for the quarter, up from \$30.7 million in the prior period. Operating income for the quarter benefited from growth in FIA account values, favorable unlocking adjustments and higher investment prepayment-related income. Partially offsetting these factors were the impact of a lower base interest spread on traditional deferred annuity account values and higher operating expenses to support business growth.
- Higher FIA account values contributed \$7.1 million more to interest margin in the quarter, offset in part by \$2.3 million of higher FIA-related deferred policy acquisition cost (DAC) amortization.
- Unlocking² adjustments, primarily the result of favorable persistency, added \$9.2 million to earnings for the quarter, compared with \$0.2 million in the previous period.
- Prepayment-related income, net of amortization, was \$8.4 million for the quarter, up from \$3.6 million in the prior period.
- **Total account values** were \$17.1 billion at quarter-end, up from \$14.8 billion a year ago. FIA account values reached \$5.0 billion, up from \$2.9 billion a year ago.
- Sales for the quarter were \$1.1 billion, up sharply from \$759.3 million in the year-ago quarter. Strong
 sales of FIA and traditional fixed annuities were driven by new product launches and continued
 expansion and increased penetration of the bank and broker-dealer distribution network.

Retirement Division: Income Annuities

- **Pretax adjusted operating income** was \$4.9 million for the quarter, up from \$2.1 million in the prioryear period, primarily due to higher investment prepayment-related income.
- Prepayment-related income was \$3.7 million in the quarter, up from \$0.8 million in the same period a
 year ago.

- **Mortality gains** were \$0.7 million for the quarter, compared with \$0.2 million in the previous period. Mortality experience is expected to fluctuate from period to period.
- Sales were \$73.6 million for the quarter, up from \$62.3 million in the prior period. Increased marketing efforts drove higher sales of single-premium immediate annuities in the bank and the brokerage general agency distribution channels. Sales continued to be impacted by a competitive market in the low interest rate environment.

Individual Life Division

- **Pretax adjusted operating income** was \$7.2 million for the quarter, down from \$10.7 million in the year-ago period. Higher earnings on the growing block of universal life (UL) and higher prepayment-related income were more than offset by unfavorable unlocking adjustments, a lower bank-owned life insurance (BOLI) base return on assets (ROA) and higher operating expenses in support of growth.
- In the third quarter of 2014, BOLI ROA benefited from a \$1.7 million reserve reduction related to 2004 purchase accounting (PGAAP). This PGAAP reserve was released over a 10-year period ending in the third quarter of 2014. The reduction in BOLI ROA also reflected higher claims relative to the prior period.
- Unlocking adjustments, primarily due to changes in business mix, reduced earnings by \$5.4 million in the quarter, compared with \$1.3 million in the same period of last year.
- Prepayment-related income, net of amortization, was \$4.6 million for the quarter, up from \$0.8 million in the prior period.
- Sales of individual life products reached \$17.6 million for the quarter, double the prior period's \$8.3 million as a result of continued success of Symetra's guaranteed universal life products in the BGA distribution network. Deposits from sales of corporate-owned life insurance (COLI) were \$36.5 million for the guarter; there were no COLI deposits in the same period of last year.

Other

• **Pretax adjusted operating loss** was \$22.3 million for the quarter, compared with \$12.1 million in the year-ago quarter. Net investment income was lower by \$5.6 million, due primarily to higher amortization of tax credit investments. Additionally, operating expenses were higher due to \$3.8 million of merger-related expenses.

Net Realized Gains (Losses)

• Net realized losses were \$56.4 million for the quarter, compared with \$14.8 million in the prior period. The increased loss reflected higher losses on mark-to-market equities, which were \$22.8 million, compared with \$12.0 million in the year-ago period, and higher impairments on fixed maturity securities, which totaled \$11.7 million, compared with \$1.6 million in the prior period. Additionally, other losses, which include FIA-related mark-to-market losses, were \$16.7 million higher in the current quarter than in the year-ago period due largely to fluctuations in the S&P 500 Index and a bigger book of FIA business.

Income Taxes

- **Provision (benefit) for income taxes** was a benefit of \$17.9 million for the quarter, compared with a provision of \$1.3 million in the year-ago period.
- Tax credits from tax credit investments totaled \$18.2 million and \$14.2 million in the third quarters of 2015 and 2014, respectively. The tax credit investment strategy contributed after-tax income of \$3.3 million in the current quarter and \$6.0 million in the year-ago quarter.

Agreement and Plan of Merger with Sumitomo Life Insurance Company

- On Aug. 11, 2015, Symetra entered into an agreement and plan of merger (the "Merger Agreement") with Sumitomo Life Insurance Company, a mutual company (sougo kaisha) organized under the laws of Japan ("Sumitomo") and SLIC Financial Corporation, a Delaware corporation and wholly owned subsidiary of Sumitomo ("Merger Sub" and, together with Sumitomo, the "Sumitomo Parties"), which provides for the merger of Merger Sub with and into Symetra (the "Merger"), with Symetra surviving the Merger as a wholly owned subsidiary of Sumitomo. Pursuant to the Merger Agreement, Sumitomo will acquire all of the outstanding shares of Symetra (other than certain excluded shares) for \$32.00 per share in cash payable at closing.
- Symetra continues to expect that the Merger will close late in the first quarter or early in the second quarter of 2016. On Sept. 28, 2015, Symetra and Sumitomo received notice of early termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended. Completion of the Merger remains subject to various closing conditions, however, including, but not limited to, approval by Symetra's stockholders, the receipt of certain regulatory approvals in Japan and the United States, and other customary closing conditions. On Sept. 30, 2015, Symetra filed a definitive proxy statement announcing a Nov. 5, 2015 special meeting for the stockholders to vote to adopt the Merger Agreement and other related matters.

This press release and the third quarter 2015 financial supplement are posted on the company's website at http://investors.symetra.com. Investors are encouraged to review all of these materials.

Use of Non-GAAP Measures

¹ Symetra uses both U.S. generally accepted accounting principles (GAAP) and non-GAAP financial measures to track the performance of its operations and financial condition. A reconciliation between each non-GAAP measure found in this press release and the comparable GAAP measure can be found in the Financial Supplement accompanying this press release. The supplement is available for download on the company's website at www.symetra.com on the Investor Relations page, under Financial Information, Quarterly Financial Results.

This press release references the following non-GAAP financial measures:

- Adjusted operating income is defined by the company as net income, excluding after-tax net realized gains (losses) that are not reflective of the performance of the company's insurance operations. The company excludes gains (losses) associated with the following: investment sales or disposals, investment impairments, changes in the fair value of mark-to-market investments and derivative investments (except for certain S&P 500 options), and changes in the fair value of embedded derivatives related to fixed indexed annuity products.
- Adjusted operating income per diluted share is defined as adjusted operating income divided by diluted common shares outstanding.
- Pretax adjusted operating income is defined as adjusted operating income on a pretax basis. It also
 represents the cumulative total of segment pretax adjusted operating income, which at the segment level
 is a GAAP measure.
- Adjusted book value is defined as stockholders' equity, less accumulated other comprehensive income (loss), or AOCI.
- Adjusted book value per share is calculated as adjusted book value divided by common shares outstanding.

Definition of Selected Financial Measures

- ² Symetra reports selected financial measures, which are commonly used in the insurance industry. Such a measure is described here:
 - Unlocking Each year in the third quarter, Symetra performs a comprehensive review of actuarial
 assumptions used for estimates of future gross profits underlying the amortization of deferred acquisition
 costs, deferred sales inducement assets and certain reserves related to life insurance and annuity
 products. Among other factors, these actuarial assumptions include future investment yields, interest
 spreads, mortality, expense and lapse assumptions. Changes to these actuarial expectations of future
 assumptions result in adjustments ("unlocking") that increase or decrease the assets and liabilities
 amortized based on estimated gross profits. Symetra may also implement actuarial modeling true-ups
 and other refinements as a part of the unlocking process. Symetra may have unlocking in other quarters
 based on information that warrants updating assumptions outside of the comprehensive review.
